

power of intelligence

■ AS_control - control and passage

AS_control is a computer-aided system for the automatic recognition of license plates for monitoring parking areas and controlling access.

License plates are recognised, independently read-out and compared with an authorized data base.

The modular structured software stores the recorded data and enables statistic analysis.

The system is offered as a software solution or as a total system including the corresponding camera technology.

Features:

- Real-time monitoring
- Variable authorisation system
- Gradated access concept for data protection
- Can be integrated into existing monitoring systems
- Statistic evaluation
