

power of intelligence

■ AS_video - By far the best

AS_video enables the evaluation of distance and speed violations recorded on videotape.

The system automatically detects all distance and speed violations. These are then displayed to the administrator as a clearly arranged list for further processing.

New artificial intelligence processes now make it possible to reduce previous post-processing times to a minimum.

The **AS_video** system encompasses a variety of software modules and the corresponding PC technology.

Benefits:

- Immensely time-saving due to automatic detection of the relevant incidents
- Complete evaluation at the PC workplace
- No reeling onto a number of recorders
- Clearly-arranged presentation of data and images
- Reduction in road markings
- Data transfer to OWI process

power of intelligence

■ AS_video - By far the best

The system for the automatic recognition and evaluation of distance and speed violations.

Master_video - Digitization

- Automatic video data digitization
- Automatic rotation of the video shot perspective

Assistant_video - Automatic calculation and quick post-processing

- Convenient setting up of measurement zones
- Synchronisation of measurement and identification video
- Fully automatic incident detection
- Simple view switching
- Automatic consolidation of incident data
- Option for manual post-processing of images and incident data
- Image enhancement: contrast, brightness, sharpness, zoom
- Generation of detailed images, fade-out of image sections
- Transfer of data to all standard OWI processes
- Export of video excerpts

CheckAndPrint - Search, display, print, statistics

- Convenient data search and display
- Informative statistical and logging functions
- Clearly-arranged and cost-effective print-out of selected incident data on normal paper
- Incident data export in Office format
